

MISSOURI NANOTECHNOLOGY ALLIANCE
THE THIRD ANNUAL MEETING
OCTOBER 6-7, 2006

SPONSORED BY:
THE RESEARCH ALLIANCE OF MISSOURI (RAM)
HOSTED BY:
THE UNIVERSITY OF MISSOURI-COLUMBIA

The [Third Annual Meeting of the Missouri Nanotechnology Alliance](#) will be held in Columbia, Missouri on October 6 and 7 2006. The theme for this conference is “Nanotechnology at the Interface with Life Sciences Research”. This conference would provide an excellent forum to hear the latest developments in life sciences related developments using Nanoscience and Nanotechnology from experts in the field from around the world. This conference is supported by the Research Alliance of Missouri.

This conference will be of particular significance for networking and to initiate interactions between scientists, engineers, and clinicians involved in research and product development in the fields of nanotechnology and the life sciences. Research officers representing federal and state agencies, and industrial corporations will discuss funding opportunities in life sciences initiatives relevant to nanoscience and nanotechnology. This conference should be especially attractive to investigators, students and specialists/non specialists from industry who want to learn about the latest developments in all aspects of nanoscience and nanotechnology including, the emerging field of nanomedicine.

Researchers from academic institutions throughout Missouri and from various other locations from within the US and overseas will discuss and present their work through key note presentations, invited lectures, and poster presentations. Subject matters covered in this meeting include, nanoscience, nanomedicine, pharmaceutical sciences, nanoeducation and materials science. Conference attendees will have the opportunity to interact with scientists and innovators from regional/national industries investing in Nanotechnology at the interface with life sciences research. A select set of commercial manufacturers and publication companies will be invited to set up their booths. We look forward to having you in Columbia, Missouri for this important Nanoscience meeting on October 6 and 7 2006.
